

SENIOR NETWORK ADMINISTRATOR (1 Position)

KK Security is a leading security firm in Kenya with operations across Africa in Kenya, Uganda, Malawi, Tanzania, Rwanda, Burundi and the DR Congo employing over 20,000 employees. We are seeking to recruit highly talented persons to join our team as a Senior Network Administrator.

ESSENTIAL FUNCTIONS:

The Systems Administrator (SA) is responsible for effective provisioning, installation/configuration, operation, and maintenance of systems hardware and software and related infrastructure. This individual will assist project teams with technical issues in all stages of a project, from inception and planning through to post delivery and troubleshooting.

These activities include the definition of needs, benefits, and technical strategy; research & development within the project life-cycle; technical analysis and design; and support of operations staff in executing, testing and rolling-out solutions. The individual is accountable for the following systems: Microsoft Server 2008~2015, Virtualization Technologies, Network Technologies, hardware (including servers and storage), and any other technologies as required. Responsibilities on these systems include SA engineering and provisioning, operations and support, maintenance and research and development to ensure continual innovation.

SA Engineering and Provisioning

- ü Engineering of SA-related solutions for various project and operational needs.
- ü Install new/rebuild existing servers and configure hardware, peripherals, services, settings, directories, storage, etc. in accordance with international standards and project/operational requirements.
- ü Install and configure systems for projects and clients as is necessary.
- ü Develop, maintain and document - installation, configuration and recovery procedures.
- ü Proficient at Business Continuity planning.
- ü Contribute to and maintain system standards, some of which may require desktop support.
- ü Research and recommend innovative, and where possible automated approaches for system administration tasks. Identify approaches that extend the business and promote new capabilities.

KNOWLEDGE/SKILLS

- MCSE certified.
- Systems Administration/System Engineer experience in Linux, Navision (MIS), CRM, Networking and firewall/cryptography.
- Virtualization software experience (VMware)
- Hardware (Dell servers, storage, Cisco and other components such as Load Balancers)
- Five years+ system administration experience as a minimum.
- Experience in effective management of helpdesk technicians.
- Self-starter capable of looking at new areas and taking responsibility for the development of skills that the business requires.

REMUNERATION

A competitive salary and benefits package is payable to the successful candidates.

Candidates who meet the above qualifications are requested to send in their applications including detailed curriculum vitae (CV), and email addresses of three referees to: hr@kksecurity.com before 20th December 2015.
