

# Web CMS

A few years ago, one question that rang in my ears from most of my web clients used to be. *"Can i edit the site myself? i'd want to do that so that i can change content"* and i'd refer them to purchasing a software.

These days, i get the question coming from other web developers asking, *" what're we going to do now? there's CMS's cropping up everywhere, are we going to lose the battle?"*

To answer these questions, i'm hosting a three part session for both business owners and Creative Designers to help explain the web situation .

## Business Owner Sessions

- Web CMS. What is it?
- Is Web CMS for me?
- What Web CMS is for me?

## Creative Designer Sessions

- What are we going to do now?
- Are we loosing this battle?
- Which way forward?

There is limited seating space for each session.

**Business Owner Sessions** being held on the 21st of March 2010

**Creative Designer Sessions** being held on the 28th of March 2010.

Each Session is being priced @ **Kshs 1610/-** per person and will last **2 Hours**.
