

CERTIFIED mobile DEVELOPER

ANDROID

Evening

6th March - 6th May
2017

COURSE DESCRIPTION

Learn from a set of qualified android lecturers from Strathmore University and build an application that you are proud to share with the world. This course introduces you to the design and implementation of Android applications for mobile devices. We blend theory and practice to help you build great applications the right way. Learn about the various stages of development on the Android platform and study topics related to User Interface, application services, permissions and security, graphics and video resources, data persistence, mobile application marketing, application hosting and more.
