M-PESA INTEGRATION PARTNERSHIP

PROBLEM:

- Do you have a POS/ERP system?
- Do your clients have MPESA till or paybill?
- Do you find it difficult to integrate to MPESA?
- Do your clients have to manually check MPESA confirmation on their phone?
- Do your clients have to manually post the MPESA transactions?

WHAT IF?

- You could easily integrate MPESA into your system in three steps?
- You could call an API that will return your all the transactions for a certain till/paybill?
- You could search for a transaction by phone number or MPESA transaction code?
- Make your clients happy and save them time when reconciling MPESA transactions and they don't have to manually type the transaction details?

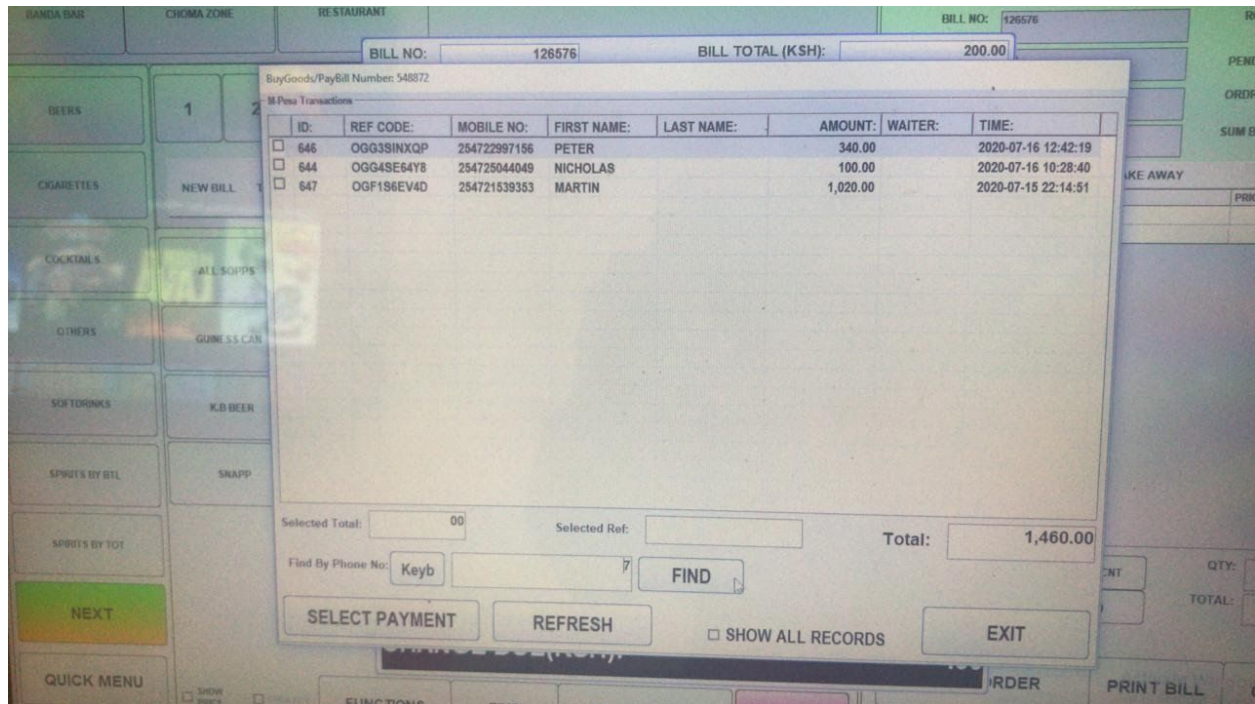

Then SapamaCash.com is for you!

SAPAMACASH - MPESA API

Our robust and secure API, empowers you to easily integrate your system to MPESA that will enable you to easily query MPESA transactions by phone number, code or status in realtime and quickly reconcile or post the transaction to your system thus saving your clients time and improving the payment experience.

HOW IT WORKS IN THREE SIMPLE STEPS

1. We integrate the clients till or paybill to SapamaCash.com. MPESA will be sending us the payments via the MPESA Daraja API. Then we'll save that information in our database
2. You'll integrate your system to SapamaCash.com using our "[Get Transactions API](#)" - This API will return a list of all un-reconciled transactions. You can also filter by phone number or MPESA transaction code. So ideally on your side you create a page/interface that shows all the un-reconciled transactions like the image below.

(screenshot from a POS using our API)

- To avoid getting the same transactions again every time you make a request to the ["Get Transactions" API](#), you'll update back the transaction that has been assigned to a sale or posted on your system using the ["Update Transactions" API](#). This API will update the transaction status and indicate that it has been reconciled, this way it will not appear in the next request.

PRICING

KES 1,000 per till/paybill per month or 10,000 per year. Cost will be paid by the client
