# Help us **build** a smarter planet

## IBM and Africa

They are changing the way the world works, both in society and business. And nothing is changing more than IT in the way. For over half a century IBM has played a vital role in Africa's development. We're now part of this formidable continent's technological fabric, business and community, and we're committed to further progress through innovation and transformation.

## Realising Africa's Potential

IBM has been helping clients drive transformation through technology for more than 100 years. We've been around since the start of computing, through to e-business, globalisation and the Smarter Planet era. We're one of the world's leading brands, with more than 400,000 employees in over 170 countries, and we have more patents and Nobel Prize winners than any other company.

With cross-industry capabilities covering healthcare, oil and gas, telecommunications, banking, government and transport, amongst others, IBM is committed to building a smarter, globally integrated Africa.

## And that's where you come in

Introducing IBM's Africa Technical Institute. A series of short training sessions delivered by IBM subject matter experts demonstrating our products and solutions and how IBM technologies and services transform, simplify and create a smarter planet.

Current or perspective clients, business partners, IT students and academia are invited to attend but spaces are limited so please apply now.

**\*Attendance will be by invitation only for those who qualify.**

**Join us.** Find out how our global network of experts and our local knowledge, backed by IBM's financial strength; enable us to deliver innovative solutions to help clients and a broad spectrum of partners address Africa's challenges.

***Students are encouraged to bring their laptops to the training.***
